(if you don't download it, but add dropbox to your file structure, and open from there in excel, saving it will automatically save/sync the latest version to dropbox)

How to add states?

1. add one tab for each state
2. copy and paste seasonal information from different sources onto this tab
 - make sure that the source is mentioned for each row

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q
1	vegetable	Fork Range	helpcolumn	January	February	March	April	May	June	July	August	September	October	November	December		
2	apples	Apple	applesApple									Starting Now	Prime Time		Last Chance	Seasonal Food Guide

9	cauliflower	Apple	cauliflowerApple										Starting Now	Prime Time	Last Chance	Seasonal Food Guide	
10	celery	Apple	celeryApple	Prime Time	Last Chance								Starting Now	Prime Time	Prime Time	Seasonal Food Guide	

3. add an extra column for the Fork Ranger name of the vegetable (this allows for easier sorting later on)

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q
1	vegetable	Fork Range	helpcolumn	January	February	March	April	May	June	July	August	September	October	November	December

9	cauliflower	Apple	cauliflowerApple										Starting Now	Prime Time	Last Chance	Seasonal Food Guide	
10	celery	Apple	celeryApple	Prime Time	Last Chance								Starting Now	Prime Time	Prime Time	Seasonal Food Guide	

4. create a list of options in this column (Data>Data Validation)

- select 'List'
- make sure the list refers to all vegetables as on the Seasonal Products tab and make the list long enough that it includes extra white spaces so that you can add vegetables later
- drag this down so all cells in this column have this list

5. add the correct label in this column → if you start typing the available options show up, hit enter, and continue (don't scroll through the list, takes ages... ;))

- veggies that we won't further research can be marked with an X
- anything which you are not sure of can be marked with an X and marked yellow so we can look at it together

6. Copy all seasonal products under the Fork Ranger name

- use the `=CONCATENATE(A4;B4)` formula to tie the text strings from column A and B together for the respective row (we will use this later to search for the Fork Ranger truths when looking at the region)

How to add regions?

Note: I can also prep these for you if you get stuck ;)

- Add one tab for each region
- Create on the top row the numbers 1 to 12 (for the months) - like below
- Add in the first column the Fork Ranger name vegetable (only the first one) - like below

4. Create in the second column a list of the states you'd like to include in this region - like below

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O
1			1	2	3	4	5	6	7	8	9	10	11	12	
2	Abrirot	Alabama	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	
3		Georgia	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	
4		Mississippi	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	
5		North Carolina	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	
6		South Carolina	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	
7		Tennessee	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	
8		Virginia	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A	#N/A

5. Add this formula =VLOOKUP('South-East (2)'!\$A2;Alabama!\$C:\$O;C\$1+1;FALSE) → replace the Alabama reference by the right reference, keep all other references the same
6. Drag this formula across the row, so it applies to all 12 columns
7. Check if it correctly returns data: if you add something for that vegetable in the respective state for the Fork Ranger truth, it should show up here (0 means no data, #N/A means now row found with these characteristics (maybe there is no Fork Ranger truth row yet?) - or if all of them are #N/A it means the vegetable spelling could be wrong
8. Copy this for the other states to complete this overview for one vegetable
9. Copy selected cells below to the cells underneath

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P
1			1	2	3	4	5	6	7	8	9	10	11	12
